

Important Information:

- Da Cheng China Balanced Fund ("The Fund") is an investment fund and not a bank deposit. There is no guarantee of the repayment of principal. There is also no guarantee of dividend or distribution payments during the period you hold the units of the Fund. The instruments invested by the Fund may fall in value and therefore your investment in the Fund may suffer losses.
- The Fund invests primarily in a diversified portfolio of domestic securities traded in China and denominated and settled in RMB.
- The RQFII policy and rules are new and there may be uncertainty to its implementation and such policy and rules are subject to change. The uncertainty and change of the laws and regulations in the PRC (including the RQFII policy and rules) may adversely impact the Fund and such changes may also have potential retrospective effect. Investing in PRC-related companies and in PRC markets involve certain risks and special considerations not typically associated with investment in more developed economies or markets, such as greater political, tax, economic, foreign exchange, liquidity, legal and regulatory risk.
- The Fund is denominated in RMB and the majority of the investments of the Fund are made in RMB. Investors may invest in the Fund in RMB, HKD as well as USD. There is no guarantee that RMB will not depreciate. Investors should take into account the potential risk of loss in respect of creations, redemptions and dividends arising from fluctuations in value between HKD/USD and the RMB.
- The valuation of the Fund's investments may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations should prove to be incorrect, the Net Asset Value of the Fund may be adversely affected.
- Investment involves risks. There is a risk that you may lose a substantial part of all your investment. You are advised to consult the intermediary before investing. You should not invest in the Fund unless the intermediary who sells it to you has explained to you that the Fund is suitable for you having regard to your financial situation, investment experience and objectives.
- You should not make any investment decision solely based on this document alone. Investors should read the Fund's Explanatory Memorandum for further details including risk factors.

INVESTMENT OBJECTIVE

The Fund is a balanced fund and the investment objective of the Fund is to seek long-term growth of capital and income. The Fund seeks to achieve its objective through investing directly in fixed income and equity securities issued in China. The majority of the investments of the Fund will be onshore investments in China and will be denominated and settled in RMB.

PERFORMANCE SINCE INCEPTION^{1,2,3} (Class A)**FUND MANAGER'S COMMENTARY**

In April, the A-share market rebounded after an initial decline, with the Shanghai Composite Index, the CSI 300 Index, and ChiNext Index declining by 1.70%, 3.00%, and 7.40%, respectively. Sector-wise, beauty care, agriculture and retail were the top risers, with the sharpest declines witnessed in power equipment, telecommunication, and home appliances.

On the macroeconomic front, although China's economy got off to a good start in the first quarter with a 5.4% year-on-year GDP growth and accelerated industrial production, the international trade environment remains complex, underscoring the need for sustained policy support. The April Politburo meeting delivered a positive signal, calling for the "expedited implementation of more assertive macro policies" and the "timely introduction of incremental reserve policies in response to evolving conditions". This indicates a dual-track approach - that is, policymakers will coordinate between implementing existing measures to stabilize expectations and preparing new ones to mitigate uncertainty, both aimed at reinforcing the economic recovery trajectory. As for tariffs, after rounds of mutual tariff hikes, the tariff rates between China and the U.S. have reached very high levels. Further increases would be economically meaningless and could raise stagflation risks for the U.S., particularly under its "reciprocal tariffs" approach. It is thus anticipated that once the 90-day tariff suspension period ends, the U.S. may lower tariffs on Chinese imports, paving the way for renewed bilateral negotiations, with the timing of such discussions warranting close attention. Globally, the Trump administration's tariff policies have intensified inflationary pressures and clouded the U.S. economic outlook, making the Federal Reserve's stance on monetary policy more unpredictable.

In the face of a complex international environment, Chinese leadership has undertaken diplomatic engagements to deepen economic and trade ties, and affirm its commitment to multilateralism and the resilience of global supply chains - leveraging the certainty of high-quality development to navigate external volatility. Domestically, the launch of China's version of a "stock market stabilization fund" proceeded on schedule and has already entered the market to provide liquidity and support. With the backing of state institutions, the A-share market is expected to maintain overall stability, with a tilt toward large-cap stocks. From an investment strategy perspective, the fund will pay particular attention to domestic demand and areas with self-sufficiency potential. Key sectors include: i) domestic demand - consumer services, retail, and food and beverage, and ii) semiconductors, software, and telecommunications equipment.
