Da Cheng Short Term Bond Fund

April 2026

Important Information:

- Da Cheng Short Term Bond Fund ("The Fund") is authorized by the Securities and Futures Commission (the "SFC") in Hong Kong under Section 104 of the SFO. SFC authorization is not a recommendation or endorsement of the Fund nor does it guarantee the commercial merits of the Fund or its performance. It does not mean the product is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors.
- The investment objective of the Fund is to achieve long term capital growth through investing globally in a portfolio consisting primarily of short-term debt securities denominated in USD, EUR, HKD or RMB, which aim to generate a steady flow of income in addition to capital appreciation for the Fund, including debt securities issued in emerging markets. There can be no assurance that the Fund will achieve its investment objective.
- The Fund primarily invests in short-term deposits and fixed income instruments and debt securities including but not limited to USD, EUR, HKD or offshore RMB denominated debt securities (i.e. "Dim Sum" bonds), government bonds, fixed and floating rate bonds, zero coupon bonds and convertible bonds. The Fund may also invest in commercial papers, certificates of deposits and commercial bills.
- The value of units may go down as well as up. Past performance or estimate is not indicative of future performance.
- Investment involves risks. There is a risk that you may lose a substantial part of all your investment. You are advised to consult the intermediary before investing. You should not invest in the Fund unless the intermediary who sells it to you has explained to you that the Fund is suitable for you having regard to your financial situation, investment experience and objectives.
- Investment involves risks. Investments are subject to investment risks, Currency risk, Risk associated with debt securities rated below investment grade or unrated, Emerging markets risk, Risks associated with debt securities, Risks of investing convertible bonds, Risks associated with investments in LAPs, Risks associated with collateralised and/or securitised products, Risks of investing in other collective investment schemes/funds, Risks relating to securities financing transactions, Hedging / derivative risk, PRC related risks, Risks associated with urban investment bonds, RMB currency risk and RMB denominated classes risk, MOP denominated Classes risk and Distributions out of/effectively out of capital risk, etc.
- You should not make any investment decision solely based on this document alone. Investors should read the Fund's Explanatory Memorandum for further details including risk factors. The Fund may not be suitable for all investors.
- This material is issued by Da Cheng International Asset Management Co., Ltd. ("DCI") and has not been reviewed by the SFC.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to achieve long term capital growth through investing globally in a portfolio consisting primarily of short-term debt securities denominated in USD, EUR, HKD or RMB, which aim to generate a steady flow of income in addition to capital appreciation for the Fund, including debt securities issued in emerging markets.

1. Source: Bloomberg, DCI, all information as at 30 April 2026.
2. The performance is calculated based on the NAV per Unit of each class. NAV to NAV with income (if any) reinvested.
3. Calculated upon the credit ratings in relation to the individual securities held by the Fund provided by Bloomberg, Date: as at 30 April 2026.
4. The average credit rating is determined by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying investments without taking into account derivative positions and unrated securities.
5. Portfolio average yield represents the return of the bonds held to maturity, the calculation takes into account the interest income, the ratio between capital gain and loss and the actual price of the bond. Positive distribution yield does not imply a positive return.
6. Annualized yield is calculated as follows: (dividend amount/NAV as of payment date) x 12.
